

ATLANTICO VIDEO DOORPH ONE

Color or b/w: choose design and technology.

Atlantico by Urmet is an electronic video doorphone with clean-cut, frill-free lines, designed by De Lucchi Design. It is easy and quick to install and can be wall- or tabletop-mounted using the specific optional tabletop conversion kit. It features a back-lit door release key, 2 extra keys for intercom or auxiliary

services (switching on of stair lights, opening of an extra door, etc.) without forgetting volume adjustment and a MUTE function that excludes the call with concurrent display of a red light. You can choose from two Atlantico video doorphone system models: the first of the color type with a 4"

TFT display (liquid crystals) while the second has a 4" b/w flat screen. Atlantico is easy to install as the conductors are connected to terminal boxes fitted on specific brackets to which the monitor is fastened. With its forefront technology, Atlantico is very flat and can therefore be directly wall-mounted with

the need for embedding boxes. Atlantico blends seamlessly with any type of architecture and internal decoration, with also the possibility of personalizing the faceplate provided.

ATLANTICO VIDEO DOORPH ONE

A complete range, also of accessories.

Also for the Atlantico video doorphone system, Urmet technology offers a full array of accessories and additional devices that can be used in any type of installation and are designed to cater to all application requirements. From the "tabletop" conversion kit to the many different types of add-on modules, such as the extra buzzer or additional buttons for supplementary services. Urmet sets no limits on design and implementation.

Volume adjustment.

Backlit door release key.
