The PAC Promise

All of us at PAC International are ready to help you in any way we can. We have a fully trained Customer Service Team of Engineers, as well as Sales and Marketing staff, who are always available to provide help and support. Please do not hesitate to call us. In addition, we would like you to let us know if we ever fail to meet the high standards we set ourselves.

Our goal is to provide you with on-time, defect free products and services.

We promise to deal with any enquiry as soon as we can and to keep you informed at all times.

...That's the promise PAC makes to you!

Français

La promesse de PAC

Tout PAC International met les moyens nécessaires pour vous assister. Nous mettons à votre disposition un service clientèle composé d'ingénieurs, ainsi qu'une équipe commerciale et marketing disponible et toujours à l'écoute pour répondre à vos attentes. N'hésitez pas à nous contacter.

De plus, si nous n'avons pas respecté nos engagements, nous comptons sur vous pour nous le faire savoir.

Notre but est de vous assurer un service de qualité. Nous nous engageons à traiter toute demande dans les plus brefs délais et nous vous tiendrons toujours informés.

PAC s'y engage!

Español

La promesa de PAC

Todos nosotros en PAC International estamos dispuestos a ayudar al cliente hasta donde podamos. Disponemos de un equipo de ingenieros de servicio al cliente y de personal de ventas y marketing que no tienen más propósito que ayudar y prestar apoyo. El cliente no debe dudar en llamarnos.

Además, deseáramos que se nos hiciera saber si hemos dejado alguna vez de cumplir las rigurosas exigencias que nos hemos impuesto. No pretendemos más que ofrecer al cliente productos y servicios oportunos y sin defectos.

Prometemos tramitar cualquier consulta lo más pronto posible y contestaremos al cliente en todo momento para informarle.

¡Esta es la promesa que hace PAC!

Deutsch

Das PAC Versprechen

Alle PAC-Mitarbeiter sind gerne bereit, Ihnen in jeder Angelegenheit zu helfen. Unser perfekt ausgebildetes Team von Ingenieuren, Verkaufs- und Marketing-Mitarbeitern steht Ihnen jederzeit zur Verfügung. Zögern Sie nicht, uns anzurufen.

Wir bitten Sie auch, uns anzusprechen, wenn wir den, von uns festgesetzten, hohen Standard nicht erfüllen. Unser Ziel ist eine rechtzeitige Lieferung fehlerloser Produkte sowie perfekter Service.

Wir versprechen jede Anfrage so schnell wie möglich zu bearbeiten und jederzeit werden wir Sie auf dem laufenden halten.

...So ist das PAC-Versprechen!

PAC EasiNet™

Plug n' Play Access Control

Access Control
PC Administration
Software

PAC EasiNet PC Administration Software

We are pleased to introduce the next generation of access control - the PAC 202/EasiNet range. This is the first of our new family of organic access control solutions that will truly grow with your customers.

PAC EasiNet is a flexible, innovative PC based access control solution designed to be used with the new PAC 202 Series Access Controllers, giving low cost but sophisticated, access control for up to 128 doors.

The system offers ease of use, simplicity of installation, and true scalability making it particularly suitable for small and medium sized installations. The PAC 202/EasiNet is available in starter and expansion kits making it even easier to order and set up.

- The system can use simple to program and understand Security Levels or the more traditional Access Groups to define Access for Keyholders.
- The system can be either Door based or Area based. In a small system the added complexity of creating Areas is completely removed.
- Time Profiles can be graphically created with many more Time Periods than has previously been possible.
- A separate holiday day can be defined for each Time Profile which allows for far more flexibility.

Reasons to choose PAC EasiNet PC Administration Software:

- Now with free Photo ID
- Available in 32, 64 and 128 door versions
- Up to 20,000 users
- Compatible with new PAC 202 Two Door Access Controllers
- 32 bit software
- Intuitive user interface
- Plug and play networking
- High speed RS-485 communications to PAC 202 Access Controllers
- Software updates downloadable from the web
- PAC 202 firmware updates downloadable from the web
- Compatible with the 2100 / 2200

Features

Intuitive User Interface

The user interface has been specifically designed for the different users of the system - installers, operators and supervisors. Each user's needs have been taken into account and the system provides a tailored user interface with only the features each user requires.

32 Bit Software

The software is written using the latest Microsoft tools providing a scalable platform supporting all the latest Microsoft operating systems.

Plug and Play Networking

This feature allows the hardware to be installed without needing to set any dip switch or addresses. The PC software simply identifies all hardware available on the network and allows the installer to easily configure it.

Downloadable Software

This feature allows for software updates to be carried out by the end user or installer with the minimum of effort. Software updates can be automatically downloaded across the web from PAC's web site.

ID Card Designer

This new feature lets users simply create effectively designed ID cards. By utilising drag and drop functionality cards can be easily customised to the user's requirements and can be easily edited. It also provides the ability to create templates to print onto magstripe and smart cards with no effect on the technology.

Image Capture

Supporting the ID Card designer this feature enables users to easily capture images from digital technologies, including the facility to grab still images from video cameras and transfer them into card designs.

System Requirements: Windows 2000 Professional SP2, Windows XP Home, or Windows XP Professional.

Processor: 500 MHz Pentium III or greater

Memory: 256 Mbytes or greater

Hard Disk: 5 Gbytes or greater

21762.30 - PAC EasiNet PC Administration Software - 64 Doors

21762.40 - PAC EasiNet PC Administration Software - 128 Doors

Dimensions

Boxed: H: 330mm W: 330mm D: 95mm

Unboxed: H: 180mm W: 125mm D: 60mm

Weight: 6.34kg (Boxed)

Operating Temperature: 0°C to +50°C

Packaging: Pre-packed

Part Numbers

21052 - PAC 202 Two Door Access Controller (boxed with power supply)

21053 - PAC 202 Two Door Access Controller (unboxed)

21591 - Starter kit

The PAC 202 Access Controller offers PAC's proven reliability in an easy to use networkable access control solution. PAC 202 Access Controllers are controlled and administered from a PC running PAC EasiNet software. As part of a PC based system using EasiNet software, a maximum of 128 doors can be controlled.

- Networkable system
- Up to 20,000 users
- Boxed and unboxed versions
- One-Touch™ installation testing
- Downloadable firmware
 - DIN rail mounting
 - Plug and play networking
 - Compatible with PAC and KeyPAC readers
 - High speed RS-485 communications

Features

The PAC 202 Access Controller is available as a boxed and unboxed version.

PAC 202 Two Door Access Controller (boxed with power supply)

The Access Controller is supplied with a metal enclosure and 3A 12V DC power supply. Support for both the locks and four readers.

PAC 202 Two Door Access Controller (unboxed)

The Access Controller is supplied mounted on a back plate suitable for mounting on a standard DIN rail.

One-Touch™ Commissioning

This feature provides the installer with an easy way to test and commission the system as individual building blocks. No programming of the system is required and the commissioning phase of the system can be split between skilled and semi skilled staff.

Downloadable Firmware

This feature allows for software updates to be carried out by the end user or the installer with the minimum of effort. No EPROMs or chips need to be physically changed.

DIN Rail Mounting

The controllers are provided with a DIN rail mounting back plate. This facilitates the mounting of multiple units simply and quickly in an enclosure of the installer's choice.

Plug and Play Networking

This feature allows the hardware to be installed without needing to set any dip switches or addresses. With the EasiNet PC software the installer can simply identify all hardware available on the network; the software allows the installer to easily configure it.

21592 - Expansion Kit
