- Microsoft Access formatted POS transaction database for easy event analysis and integration
- Adjustable POS text font, text color, background color and text alignment on screen and video files
- Abnormal transaction alerts via e-mail, phone, SMS or by alarm output
- Cash drawer opening event triggers event log for video retrieving.

Applications

- Convenience Stores
- Retail Stores
- Fast Food Restaurants
- Gas Stations
- Grocery Stores
- Parking Lot Toll Booths...

POS transaction history will be kept in the system log database

Search video files by transaction keywords

Search video files by transaction event

Superimposed transaction data on the video recording

Compare transaction data to video event for identifying fraud or unintended operational error

The screenshot displays the 'Event Info From 2003/12/31 to 2003/12/31 - Advanced Log Browser' window. The main window shows a list of events with columns for ID, Time, Camera, Event, and Size. A video player is open, showing a scene with a cashier and a customer. Overlaid on the video is transaction data: '2003-12-30 15:16:31.842 Camera 11'. A search dialog box is open, allowing users to search for video files by transaction keywords (e.g., 'code'), POS event (e.g., 'Transaction Void'), start time, and POS (e.g., 'Forward', 'Backward').
